

## Penstocks / Stoplogs

Half Bridge Scrapers

Picket Fence Thickeners (PFT)

Grit Traps

### Recent Installations

- Bantry WTP

**Response Group** manufacture and install a range of penstocks which operate by the movement of a stainless steel gate within a stainless steel frame.

The Penstock can then be operated manually, or automatically through the installation of an actuator which can also be tied back into a SCADA system.

We offer Penstocks in a variety of sizes to suit the requirements of the water and wastewater industry. These penstocks can be either wall or channel mounted. Remote operation of the gate can be facilitated through the installation of tube extensions.

### Key Features

- S/S structure
- Simple On-Site Connections
- Easily Maintained
- Range of sizes
- Wall mounted or channel mounted
- Vertical Slide

### Optional Features

- Actuated Motor
- Available 'off-set' and 'on-set'
